

# Riccardo Franceschini

## Robotic Researcher

### About Me

I am a curious and passionate robotic researcher who loves tackling new challenges and pushing the boundaries of deep learning. Always eager to explore, I thrive on turning innovative ideas into real-world solutions.

## Passions

## Work Experiences

- Robotic Researcher @ Eurecat** jul 2021 - now  
Developing and deploying advanced autonomy and shared-autonomy teleoperation for aerial inspection. It integrates augmented reality elements and deep learning approaches, running on embedded hardware, to retain human decision-making while leveraging autonomy features  
Technology used : C++, Python, Pytorch, Robot Operating System (ROS1/2), OpenCV, Open3D, Unity 3D, TensorFlow, Docker, Git, DDS
- Deep Learning Researcher @ University of Trento** feb 2020- jul 2021  
Development of deep learning multimodal attention methods, combining combining extracted information from text, audio and video for emotion recognition in the context of human robot interaction  
Technology used : Python, Pytorch, Numpy, Sci-kit, Pandas, Docker, Git
- Deep Learning Researcher @ FBK** oct 2020 - dec 2020  
Research on for an external company on unsupervised human pose keypoint estimation from video sources  
Technology used : Python, Pytorch, Numpy, Sci-kit, Pandas, Git
- Deep Learning Researcher @ Bosch** feb 2020- oct 2020  
Development of deep learning attention methods for pedestrian and vehicle future trajectory prediction in the context of autonomous driving  
Technology used : Python, Pytorch, Docker, Git
- Full Stack Developer Intern @ Zucchetti Healthcare** mar 2018- jun 2018  
Development front-end and back-end of a Social Media Website in nursing houses for supporting reminiscence activities.  
Technology used : HTML, CSS, React Js, Node Js, SQLite

## Studies

- PhD, Human-Robot Interaction** 2021-2024  
Industrial Robotic & AI PhD at Danish Technical University conducted at Eurecat (Spain) under the MSCA-ITN programme  
Thesis Title : : Designing a Human-Drone Interaction: Insights from the AeroAssistant Framework
- MSc, Autonomous Systems** 2018-2020  
European Double Program at University of Trento (Italy) and Aalto University (Finland) under the EIT Digital Master Programme  
Major Robotics & AI | Minor Business & Entrepreneurship  
Thesis Title: Feasible and adaptive attention-based models for multimodal trajectory prediction in urban driving scenarios
- BSc, Computer Science** 2015-2018  
Bachelor degree at University of Trento, Italy, ranked 1st for CS in Italy
